NONCONFORMIST — sage solo, SAGE-3B dark warehouse

same 8-block skeleton as 3A; B adds a background texture layer and one peak

second experiment, after 3A | target ~6–7 min if supported | ~126 BPM (est.) | instrumental | no new lead hook

1 3A OVER 3B, BLOCK BY BLOCK

shared axis = Lyrics block order, not time · dashed = Suno-generated

2 WHAT KEEPS B IN BOUNDS (verbatim Styles excerpts)

"Add muted dub-chord shadows, filtered rhythmic ghosts, distant metallic echoes and gentle analog grit only as background textures."
"… culminating in a deeper rolling peak without a new lead hook."
"No vocals, trance leads, industrial aggression, festival risers or EDM drops."

3 CAVEATS

- run 3B only after 3A works; a new lead or new harmony → back to 3A
- axis = block order, not time; bracket Lyrics are guidance only
- B5 names only the kick as gone → low end drawn reduced, not off
- ~126 BPM = estimate · textures drawn only where the Lyrics name them
