NONCONFORMIST — Techtoon ep.01/24, sound DNA

which layers carry the snippet, and which 59 s to upload

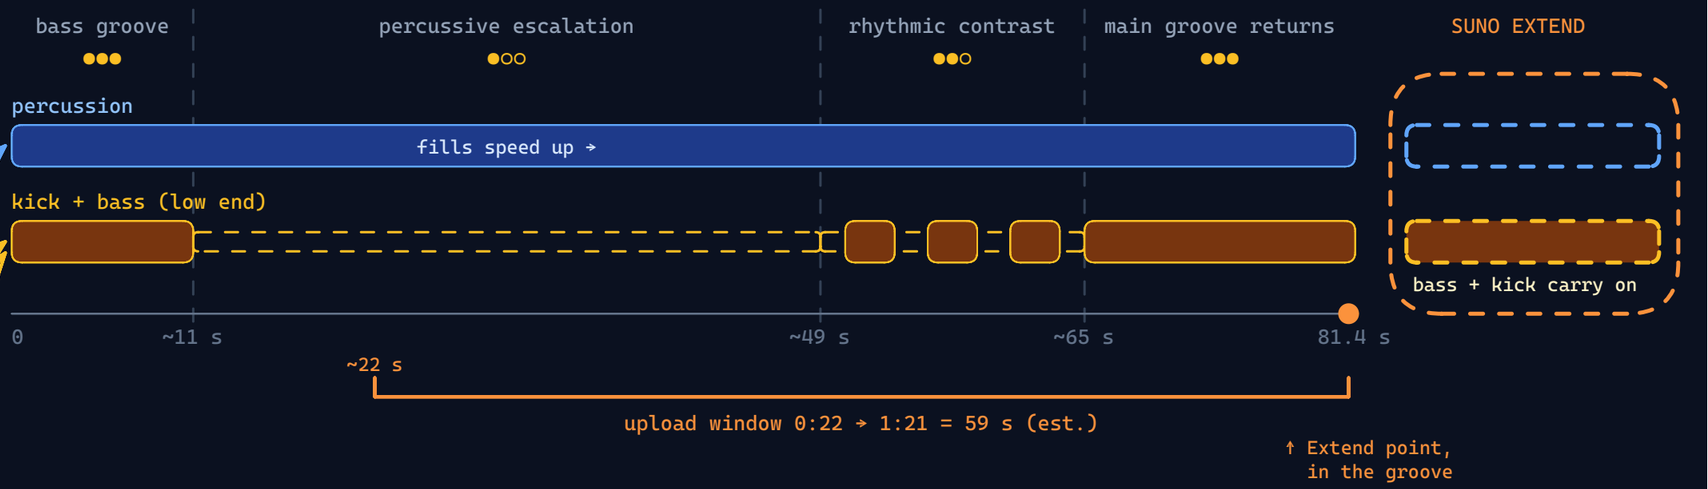

~123 BPM (est.) | 4/4 | 81.4 s snippet | ends on the groove

2 SOUND LAYERS (high → low)

	preserve
TONAL MOTIF restrained, repeating pitched figure	essential
HATS / CLAPS tight, ticking high-frequency rhythm	high
TEXTURE swirling, rattling, processed perc.	high
PERCUSSION rapid tom/conga-like fills, syncopated	essential
BASS rounded, bouncing, repeating motif	essential
KICK firm, steady techno foundation	essential

transitions: dense drum development
→ simpler groove · essential

3 SNIPPET MAP 0 → 81.4 s (estimated, unverified)

the snippet ENDS on the established groove → Extend picks up from a solid bass + kick
(sage solo ended in a percussion passage; this one does not)

4 CAVEATS

- ~123 BPM and all section times = analysis estimates (listening + low-frequency energy), not the DAW project
- align both cuts to bars: at ~123 BPM (est.) one 4/4 bar ≈ 1.95 s · alt. cut 0:00 → 0:59 ends inside the perc. passages (my reading: weaker)
- ●●○ and the three short low-end blocks in 0:49–1:05 = my reading of "brief low-end returns" · dashed = reduced or Suno-generated
