NONCONFORMIST — sage solo, Suno Extend SAGE-3B (dark warehouse)

Problem

Evolve the same groove into a deeper late-night warehouse track while keeping the source rhythm and drum breaks. Second experiment, after 3A works; target ~6–7 min if supported.

Instant solution

Styles (958 / 975 characters)

```
Continue the uploaded Gabe Sage live-session excerpt seamlessly at around 126 BPM in 4/4. Darker late-night warehouse minimal techno built from the original funky tribal rhythm, not a new song. Preserve the tight kick, elastic syncopated bass pulse, dry clap/snare, shuffling hats, woody conga and tom syncopation and fast rolling fills. The excerpt finishes in a percussion-only section: let that rhythm breathe, then reintroduce its familiar kick-bass groove with increasing weight. Add muted dub-chord shadows, filtered rhythmic ghosts, distant metallic echoes and gentle analog grit only as background textures. Build tension through drum-layer swaps, deliberate bass dropouts, short spatial breaks and gradual re-entries, culminating in a deeper rolling peak without a new lead hook. Tight mono sub, punchy uncluttered drums, dynamic club mix, long DJ-friendly reduced outro. No vocals, trance leads, industrial aggression, festival risers or EDM drops.
```

Lyrics (instrumental arrangement instructions)

```
[Instrumental Only]
[Continue Existing Drum Break]
[Preserve the syncopated hand-drum and snare patterns]
[Add distant filtered percussion echoes]
[Deep Groove Return]
[Gradually restore the original kick and elastic bass]
[Introduce a subtle darker warehouse texture]
[Hypnotic Development]
[Original bass and percussion remain dominant]
[Small filter movements and rhythmic variations]
[Rhythmic Tension]
[Increase percussion density]
[Short bass dropouts and rolling tom fills]
[Atmospheric Breakdown]
[Kick disappears]
[Percussion echoes and muted chord shadows remain]
[Progressive Re-Entry]
[Original bass rhythm returns first]
[Full kick and hats return gradually]
[Warehouse Peak]
[Deeper low end, crisp percussion, controlled intensity]
[No dominant new melody]
[Extended Outro]
```

```
[Remove atmospheric textures]
[Strip back to drums and original rhythmic elements]
[Instrumental End]
```

	3A Faithful	3B Warehouse
Goal	complete the live groove	evolve it darker
New material	none (percussion variations only)	dub-chord shadows, metallic echoes, analog grit
Peak	none, steady groove	"Warehouse Peak"
Risk	too static	new harmony, loses the funky feel
Order	**first**	after 3A works

Why it works / gotchas

- "only as background textures" and "without a new lead hook" carry the guardrails; if Suno adds a lead anyway, go back to 3A.
- The bracket Lyrics are guidance, not timeline control.
- The ~126 BPM in Styles is an estimate; fix it here if a DAW gives another value.
- Blank lines between sections were removed for compactness.

Diagram brief

- Type: A row over B row on one shared time axis.
- B blocks: Drum Break → Deep Groove Return → Hypnotic Development → Rhythmic Tension → Atmospheric Breakdown → Progressive Re-Entry → Warehouse Peak → Extended Outro.
- Mark B-only textures (chord shadows, echoes, grit) as a dashed layer; mark the peak.
