NONCONFORMIST — Techtoon ep.01/24, release facts and musical identity

Problem

Say in one breath what the snippet is and which traits must survive any continuation.

Instant solution

Fact	Value
Artist / title	Gabe Sage — Techtoon liVE session ep.01/24 (@JFA studio72)
Platform	Audius (`audius.co/esha_szabo/techtoon-live-session-ep0124-jfa-studio72`)
Genre / mood	Techno / Sensual
Tags	live, techno, pure, 808, Maschine, Diva, Ableton, Melodic, Roland, Effect
Released	2024-01-16
Length	57:33 (3453 s), a full live set
Working material	81.4 s snippet (length as reported by the analysis)

Identity in one sentence: the contrast between a smooth, pulsing bass groove and unusually busy, almost cascading percussion fills.

Traits to preserve:

1. Rounded, bouncing, repeating bass motif.
2. Firm, steady techno kick.
3. Rapid tom/conga-like fills and syncopated strikes.
4. Restrained, repeating pitched electronic figure (the tonal motif).
5. Tight, ticking hats and clipped claps.
6. Dense drum development that resolves into a simpler groove.

Goal: continue the original with Extend, in three directions (5A Techno, 5B Minimal, 5C Dark Industrial) from the same 59 s upload.

Why it works / gotchas

- Release facts are from the Audius API; the trait list is an analysis estimate from the snippet, not from the DAW project.
- The snippet is ~2.4 % of the 57:33 set (81.4 ÷ 3453); where it sits in the set is unknown.
- The set's tags (808, Maschine, Diva, Ableton, Roland) do not establish which instrument made which sound in this snippet.
- My reading: lose the bass-vs-fills call-and-response and it turns into generic techno.
- Related entries: `nonconformist-techtoon-ep01-sound-dna`, `nonconformist-techtoon-ep01-suno-a`, `nonconformist-techtoon-ep01-suno-b`, `nonconformist-techtoon-ep01-suno-c`, `nonconformist-techtoon-ep01-suno-workflow`.

Diagram brief

- Type: identity core + facts card.
- Left: release facts card (Gabe Sage · Techno · 2024-01-16 · 57:33 live set · 81.4 s snippet).
- Center: IDENTITY core fed by two opposing inputs: pulsing bass motif ↔ cascading percussion fills (call-and-response), plus the tonal motif.
- Right: guardrails strip with the 6 traits.
