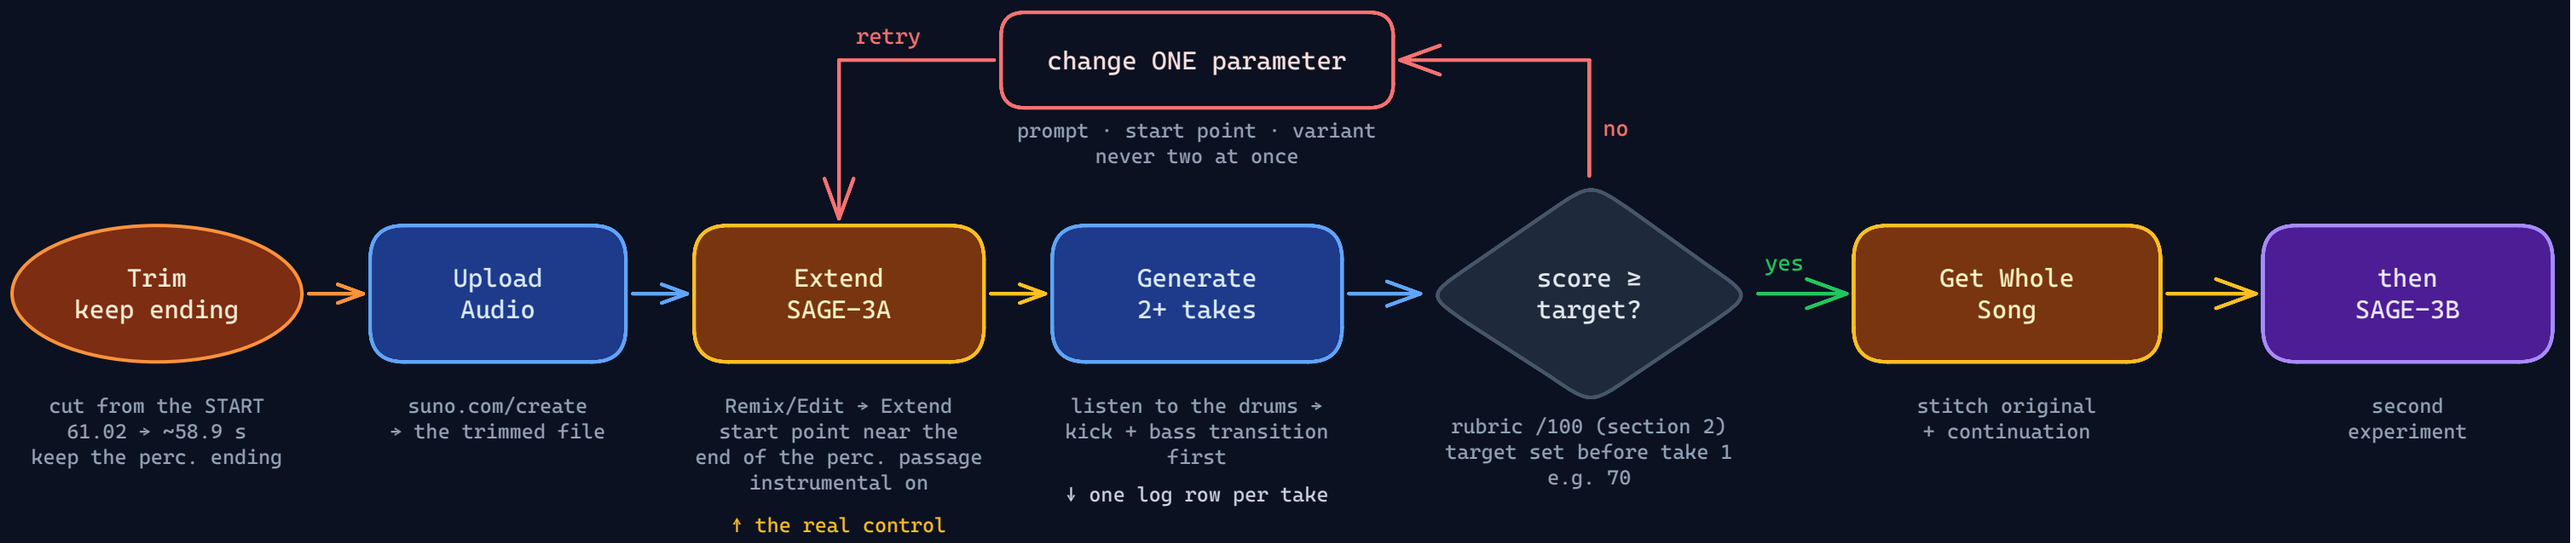
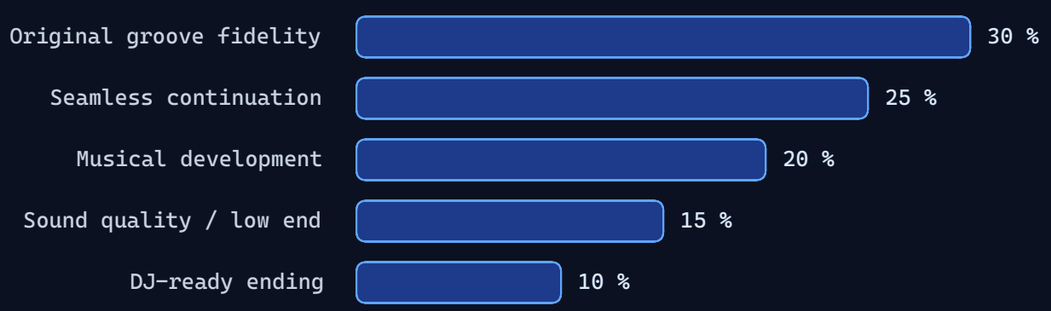
NONCONFORMIST — sage solo, Suno Extend workflow

Continue the real recording, score every take, change ONE parameter per retry.

1 THE LOOP

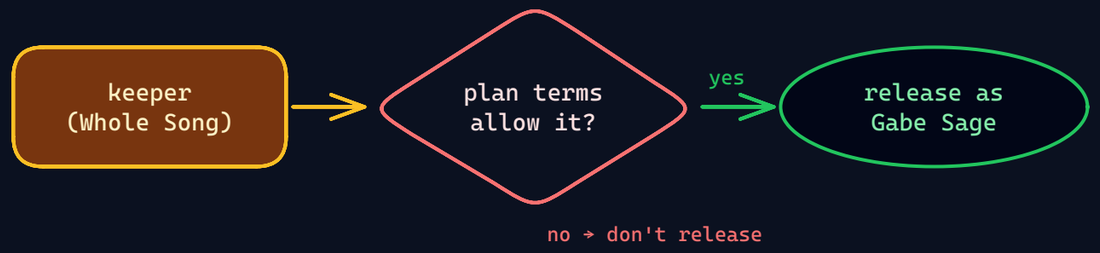


2 QA RUBRIC — weights (score 1–5 per take)



weighted = Σ score × weight × 20 · all 4s → 80 / 100

3 LICENSING GATE — before any release



Free plan: results are personal, non-commercial only,
even when the uploaded audio is your own composition.

4 CAVEATS

Suno limits (help.suno.com, checked 2026-10-20): Free upload ≤ 60 s (old article, re-check the UI) · v6 up to 8 min per generation

target 70 = house default, not from the analysis · bracket Lyrics = guidance, not timeline control

"release" node = the entry's licensing checkpoint, drawn as a gate · 3B = the next experiment, not part of this loop
