NONCONFORMIST — hell YEAH, Suno v6 Version A (faithful)

Problem

Reproduce the musical identity of the original in Suno v6 without drifting into another genre. Recommended starting version.

Instant solution

Styles

```
Hypnotic underground minimal techno, tribal tech-house and microhouse influences, 126 BPM, 4/4, instrumental. Repetitive rubbery analog synth motif with rounded, hollow, resonant plucked tones. Deep elastic rolling bassline, tight four-on-the-floor kick, intricate syncopated tribal percussion, conga-like electronic toms, woody clicks, dry rimshots, shuffled hi-hats and metallic rhythmic accents. Rapid interlocking percussion patterns and short rolling drum fills create evolving polyrhythmic motion. Subtle filtered synth pulses, warm analog character, minimal harmonic movement, gradual layering and groove development. Dark, playful, hypnotic underground club energy. Punchy controlled low end, distinct percussive transients, restrained effects, spacious but rhythmically focused production. No vocals, no dramatic EDM drops.
```

Lyrics (instrumental arrangement instructions)

```
[Instrumental]
[Intro]
[Short hollow analog synth notes establish a repetitive syncopated motif]
[Muted electronic percussion, subtle clicks and filtered rhythmic movement]
[Rhythmic Build]
[Woody percussion and metallic rhythmic accents enter]
[Rolling tom patterns become progressively more intricate]
[The central synth motif remains hypnotically repetitive]
[Groove Development]
[Shuffled hi-hats, rimshots and syncopated hand-drum textures]
[Interlocking percussion creates a playful polyrhythmic groove]
[Gradually increasing rhythmic density]
[Low-End Arrival]
[Deep four-on-the-floor kick becomes prominent]
[Rolling elastic sub-bass locks tightly with the kick]
[Existing percussion continues above the fuller low end]
[Main Instrumental Groove]
[Repetitive rubbery synth motif with subtle filter modulation]
[Layered tribal percussion and syncopated electronic drum fills]
[Dark, funky and hypnotic underground techno momentum]
[Percussive Variation]
[Short rolling tom fills and metallic accents]
[Selective percussion dropouts and gradual reintroduction]
[Maintain a continuous steady dancefloor pulse]
[Main Groove Return]
```

```
[Full kick, rolling bass and interlocking percussion]
[Minimal harmonic changes and subtle synthesizer modulation]
[Outro]
[Gradual subtraction of percussion layers]
[Filtered synth motif and bass groove slowly fade]
[End]
```

Why it works / gotchas

- The arrangement is a **proposal** for a longer track, not a transcription of the 7:38 original.
- "Low-End Arrival" is the ~24 s event from the snippet, stretched into its own section.
- Blank lines between sections were removed for compactness; Suno reads the tags either way.
- ~126 BPM in Styles is an estimate from the snippet (see `nonconformist-hell-yeah-sound-dna`); fix it here if the DAW project says otherwise.
- "No vocals, no dramatic EDM drops" in Styles is a soft hint — put the hard negatives in **Exclude** (see `nonconformist-suno-audio-reference-workflow`).

Diagram brief

- Type: horizontal arrangement timeline with a density curve.
- 8 blocks: Intro → Rhythmic Build → Groove Development → Low-End Arrival → Main Instrumental Groove → Percussive Variation → Main Groove Return → Outro.
- Curve rises steadily, steps up hard at Low-End Arrival, small dip at Percussive Variation, fades at Outro.
- Mark the synth motif as a constant line running under every block.
